

Meeting our clients' needs through research and development

Service Commitment

At Nelgar, our focus on achieving the highest technology standards is matched by our uncompromising commitment to exceptional service. We strive to provide our clients with technologically advanced optimization services backed by an unprecedented level of service and dedication to customer satisfaction.

Data Collection

Accurate information is critical to the profitable operation of oil and gas wells. At Nelgar, only highly trained personnel using state-of-the-art technology collect and analyze data. This allows us to make precise recommendations for enhancing well productivity and profitability.

Engineering

Our in-house engineering department is staffed by one of the industry's most knowledgeable and experienced teams of oil and gas specialists. In addition to designing all our equipment, Nelgar's engineering unit analyzes all the data collected by our highly trained field technologists. As a result, our clients benefit from superior technology, fast, accurate data collection, and fast turnaround times on reports specially compiled to increase well productivity.

Field Services

- Sure Shot™ Acoustic Pressure Surveys
- N.E.R.D.™ Dynamometer Analysis
- Sure Shot™ Fluid Levels
- Sure Shot™ Depression Tests
- Surface Casing Vent Tests
- Casing Integrity Tests
- Packer Isolation Tests
- Lease Inspections
- Gas Migration Tests
- Tank Tests

Engineering Services

- Pressure Transient Analysis
- Static Calculations
- Inflow Performance Relationship Calculations
- Pump Intake Pressure Calculations
- Pumping System Design
